

Megatonin[®]

Nutritional support for occasional sleeplessness

Description

If you are one of the millions of people who sometimes struggle to get a good night's sleep, you may need Megatonin[®]. Megatonin[®] helps you with occasional sleeplessness by soothing you into sleep, relaxing your body and mind so you can get the healthy rest you need.

Your body's internal clock is a precision timepiece—when it's not properly calibrated, your sleep suffers. Jet lag, odd work hours, odd play hours, and other factors can disrupt your sleep patterns.

Megatonin[®] can help your body set its internal clock to snooze. Its new and improved formula features NeuroBalance Technology™ (melatonin, GABA, and L-Theanine) to help you get the shuteye you've been craving.*

Benefits

- Chewable tablets provide convenient relief from sleeplessness
- NeuroBalance Technology™ combines melatonin, GABA, and L-Theanine into one powerful formula
- Blend of ingredients relax both body and mind, while promoting quality sleep
- Refreshing mint flavor

Recommended Use

Take 1–2 tablets 30 minutes prior to bedtime.

Megatonin[®]

(continued)

Key Ingredients

- **Melatonin**—Your body produces melatonin, which plays a role in supporting your biological clock's natural wake-sleep cycle. Supplementing your diet with melatonin supports healthy sleep and relieves occasional sleeplessness.*
- **GABA**—Gamma aminobutyric acid (GABA) is a naturally occurring neurotransmitter in the brain.
- **L-Theanine**—This beneficial phytonutrient is naturally found in green tea.
