

Neways Ingenious®

The power to think

Description

If you've ever been too tired to think straight, you know that cognition takes effort. And if you've ever eaten less-healthy food and felt sluggish, even in your thought processes, you know that nutrition is part of it too.

Optimal cognitive performance requires several interconnected body systems to work the way they should. Particularly, cognition relies on the circulatory system to distribute oxygen to the brain and on the nervous system to transmit neurological signals properly.

Ingenious® is a dietary supplement that supports neural health and circulatory system health. In addition, this supplement supports normal learning and memory functions and helps prevent mild memory loss associated with aging.*

Formulated with several herbs that are well known for their positive effects, Ingenious® improves the health of your mind so you can have the power to think.*

Benefits

- Supports against mild memory loss associated with aging*
- Supports circulatory system health*
- Supports neural health*
- Supports normal learning and memory functions*

Key Ingredients

- *Vitamin B₅*
