TrueTouch® Clarifier

A mild exfoliator that leaves skin smooth and luminous

Description
TrueTouch® Clarifier is a mild exfoliator that gently sweeps away dead skin cells and surface impurities, leaving skin smooth and luminous. Featuring a unique blend of natural bamboo, jojoba beads, and prickly pear, this natural, new generation clarifier conditions, tones, and tightens pores, reorienting the complexion and rejuvenating skin, leaving it in a receptive, balanced state.

Key Benefits
- Sweeps away dead skin cells and surface impurities without primitive scrubbing or harsh enzymatic chemicals
- Massages and polishes skin surface with jojoba beads, olive oil and amino acids, leaving it smooth and luminous
- Cleans deep and hidden dirt from the pores with mild, amphoteric surfactants that don’t disrupt individual moisture levels
- Conditions, refines, and refreshes the skin while tightening pores, reorienting the complexion as a neutral, healthy looking moisture receptor
- Rejuvenates skin to a receptive, balanced state
- Fragrance free with no controversial ingredients
- Dermatologist tested and approved

Key Ingredients
Prickly Pear Extract—Gently and naturally releases dead skin cells with fruit extract to reveal new cells
Jojoba Beads—These moisturizing beads massage the complexion, gently rolling away impurities and dead skin cells to leave skin radiant
Bamboo—These flexible, brush-like particles from the renewable bamboo plants help cleanse and sweep away surface impurities and provide complexion rejuvenation during the cleansing process
Silk Amino Acids—Imparting a luxurious feel, these amino acids support excellent moisture binding and condition the skin
Vitamin E—It is an antioxidant that helps moisturize and protect the skin
Potassium Olivoyl Hydrolyzed Wheat Protein—A concentrated protein derived from olive oil and wheat, this unique compound gently softens and smoothes and helps the skin retain moisture

Ingredients We Avoid
This product avoids concentrated alpha hydroxy acids, enzymatic peels, and harsh abrasives historically used in exfoliating products.

We use ultra-soft jojoba esters, natural renewable bamboo, and prickly pear extracts. We believe these ingredients offer much friendlier exfoliation.

Recommended Use
Use two to three times per week immediately following cleansing. Using wet fingertips, gently apply to face massaging in small circular motions outwards towards hairline. Avoid eye area. Rinse thoroughly. Follow with the step #3 (Target) products for your skin concerns.
