TrueTouch® Hydrating Cream to Powder

*Look velvety smooth*

Description

You need the lasting moisture of a liquid foundation, but you like the fresh look of powder. Neways’ TrueTouch® Hydrating Cream to Powder gives you the best of both worlds.

TrueTouch Hydrating Cream to Powder is a safe, effective creamy pressed foundation that applies as a liquid and dries to a flawless powder finish. Formulated with Soft Blend Technology™, this foundation gives you a velvety-smooth application, lasting moisture, and a beautiful translucent medium-coverage finish.

So go for the smooth, dewy look you want, and rest easy knowing you’re getting moisturizers and protection for your skin as well. With seven beautiful shades to choose from, it’s easy find the Hydrating Cream to Powder that matches your natural skin tone.

Benefits

• Leaves the complexion looking dewy-fresh
• Provides a smooth, medium-coverage finish
• Leaves skin looking flawless and young

Recommended Use

Using sponge applicator, apply to face in light brushing motion until the desired coverage is achieved. Reapply as needed.
